MANAGEMENT DISCUSSION & ANALYSIS REPORT

INDUSTRY SCENARIO, STRUCTURE & DEVELOPMENTS:

About Company Introduction

This is only a summary. Investors should read the following summary with the Risk Factors mentioned and the more detailed information about us and our financial statements included elsewhere in this Information Memorandum Summary of Industry. The global pulp and paper industry consists of about 5000 industrial pulp and paper mills, and an equal number of very small companies. The annual global paper and paperboard production was approximately 382.0 million tonnes in 2006. It is expected to increase to 402.0 million tonnes by 2010 and 490.0 million tonnes by 2020. USA is the largest market for paper products and commands high per capita consumption of 260 Kgs. Asia's main markets are China, Japan, India, Malaysia, Singapore and Thailand.

(Source: Websites of global consulting group 'Pyory' and International Council of Forest and Paper Association)

The paper and paperboard industry has witnessed a radical shift in the last decade. Due to the strong economic growth in both China and India, the demand for paper and paperboard is increasing rapidly and they are expected to emerge as an important market for pulp & paper. The share of fast developing Asian markets, excluding Japan, in global consumption has increased to 34% by 2010 from 32% in 2006.

The share of mature markets like North America and Europe would fall to 50% by 2010 from 52% in 2006. It is expected that Asian market would account for 60% of global incremental production during the period 2004-2020.

Indian Paper Industry

The Indian Paper Industry accounts for about 1.6% of the world production of paper and paperboard. The estimated turnover of the industry is Rs 25,000 crore (USD 5.95 billion) approximately and its contribution to the exchequer is around Rs. 2918 crore (USD 0.69 billion). The industry provides employment to more than 0.12 million people directly and 0.34 million people indirectly. The industry was de-licensed effective from July, 1997 by the Government of India; foreign participation is permissible. Most of the paper mills are in existence for a long time and hence present technologies fall in a wide spectrum ranging from oldest to the most modern. The mills use a variety of raw material viz. wood, bamboo, recycled fibre, bagasse, wheat straw, rice husk, etc.; approximately 35% are based on chemical pulp, 44% on recycled fibre and 21% on agro-residues. The geographical spread of the industry as well as market is mainly responsible for regional balance of production and consumption.

With added capacity of approximately 0.8 million tons during 2007-08 the operating capacity of the industry currently stands at 9.3 million tons. During this fiscal year, domestic production of paper and paperboard is estimated to be 7.6 million tons. As per industry guesstimates, over all paper consumption (including newsprint) has now touched 8.86 million tons and per capita consumption is pegged at 8.3 kg.

Demand of paper has been covering around 8% for some time. During the period 2002-07 while newsprint registered a growth of 13%, Writing & Printing, Containerboard, Carton board and others registered growth of 5%, 11%, 9% and 1% respectively. So far, the growth in paper industry has mirrored the growth in GDP and has grown on an average 6-7 per cent over the last few years. India is the fastest growing market for paper globally and it presents an exciting scenario; paper consumption is poised for a big leap forward in sync with the economic growth and is estimated to touch 13.95 million tons by 2015-16.

The futuristic view is that growth in paper consumption would be in multiples of GDP and hence an increase in consumption by one kg per capita would lead to an increase in demand of 1 million tons. As per industry estimates, paper production are likely to grow at a CAGR of 8.4% while paper consumption will grow at a CAGR of 9% till 2013-14.

The import of pulp & paper products is likely to show a growing trend. Foreign funds interest in the Indian paper sector is growing. IFC, the investment arm of the World Bank is already associated with at least three of the IPMA member mills. The increasing demand for paper brings with it new challenges of economies of scale, efficient usage of resources, need to develop and expand sustainable use of fibre, and value chain management, etc. Despite the fact that the Indian Paper Industry holds its importance to the national economy, unfortunately it stands fragmented. Paper sector is dominated by small and medium size units; number of mills of capacity 50000 tons per annum or more is not more than 25. Less than half a dozen mills account for almost 90% production of newsprint in the country. There is a growing need to modernize the Indian mills, improve productivity and build new capacities.

Demand for Kraft paper

With increased economic activity the demand for paper especially Kraft paper, industrial paper, duplex boards, and corrugating material is too poised for healthy growth. Industrial paper is the highest value segment in the paper industry and accounts for 41% of the total market size.

Kraft paper is usually the brown paper that is commonly used for manufacturing brown bags, cartons, etc.

It is largely used to manufacture corrugated boxes, bags, sacks, etc. However, corrugated boxes account for 85-90 per cent of the total demand for Kraft paper. Demand for Kraft paper depends on the growth in consumer durables, the manufacturing industry, horticulture, FMCG etc. Strong growth in end-user sectors such as pharmaceuticals, horticulture, ready to eat foods, marine products, textiles, consumer durables and other industrial products is expected to result in a buoyant growth for Kraft paper. Duplex boards which are mainly used as primary packaging for various products such as pharmaceuticals, cigarettes, matchboxes, agarbattis, toothpastes and other similar consumer items is witnessing robust demand. Growing agro-based sector, including horticultural products, fresh and canned fruits, etc. This, together with the Government policy to replace wooden crates by containerboard boxes particularly in fresh fruit packaging, will create new demand for corrugated boxes Demand Drivers for Kraft paper Consumption of industrial paper is closely linked to growth in the packaging industry, industrial production and development in

packaging technology and substitution by other materials. Following are other important factors contributing to demand growth in industrial paper:-

- a) The growing popularity of ready-to-eat products, liquid products and other perishable products will result in higher demand for attractive and durable packaging, thus increasing demand for Kraft paper and duplex boards.
- b) Branding is a big driver of packaging, as manufacturers try to create identifiable and attractive brands. With more and more consumers opting for branded goods, demand for Kraft paper and duplex boards is expected to remain strong in the future.
- c) With increase in malls, departmental stores and other such modern retail formats, manufacturers use innovative packaging solutions to increase their sales.
- d) The fastest-growing end-use segments for duplex boards are foodstuffs, consumer durables, garments, pharmaceuticals, cigarettes and matchsticks. Gradual shift in population from rural to urban as well as change in lifestyle due to improvement in the standard of living, demand for duplex boards is expected to explode.

Bio Green Papers Limited is in business of Kraft Paper Production and Duplex Board Production. The Kraft Paper produced by the Company is of 70 GSM to 180 GSM quality range and used to make corrugated boxes, paper tubes, cones, match boxes, shoe boxes and cosmetic containers. The Duplex Board has 150 to 400 GSM range and used for Gift Boxes, Shoes Boxes, Product and Food Packaging and Flat Files.

Product Profile

The line of business in which BGPL is engaged in are manufacturing of Kraft Paper board, Duplex paper board and Bio Fuel plantation.

Kraft Paper:- Manufacturing Process of Kraft & Duplex Board:

Manufacturing process of Kraft & Duplex paper consists of the following stages:

1. Pulping
2. Paper Making
3. Finishing & Storage

PULPING:

The waste paper is so chosen that no deinking process is involved. Waste Paper is fed into the high speed hydra pulper filled with plain water and rotated to form a mass known as water turbulence. The mass is discharged over the wire mash. Water collected is taken away. This will give the paper higher bursting strength.

PAPER MAKING:

Paper can be defined as a sheet or continuous web of fibers. The strength of the paper is obtained by interlacing of fibers. The fibers in water suspension with requisite consistency are allowed to pass over the endless wire from where the drained away and the paper after pressing and drying are reeled. The strength of paper is determined largely by the length, diameter and thickness of wall and flexibility and bonding characteristics of fiber used. The bulk density, porosity, uniformity and other properties are dependent on the inherent qualities of fibers as well as on the treatment given in the process of manufacture. Mixing, Cleaning and Refining are done in this stage. Waste paper pulp is properly mixed in a Beater. Any dust if remaining, is thoroughly removed. This pulp is passed through Vibrating Screen, Centrifugal Cleaner and refined in Disc Refiners.

PAPER FORMING:

The refined slurry, treated with additive chemicals and binding agents is pumped into Head Box of Paper Machine and couched on to the moving moulds which takes it to Press Rolls and paper is formed. The excess water has been squeezed out and paper formed is taken to MG Drier for drying by steam and reeling.

TRIMMING & PACKING:

The dried paper is trimmed in slitter for required width – usually 48” and packed on reels for selling.

Kraft Paper is used in:

- 1) Packaging of Consumer Durables (TV, Fridge/AC/Washing Machine), Oil Packaging, Textile Industries, Yarn Industries, Engineering Goods, Fruits / vegetables / Flowers, Pharmaceutical Companies, Foods & Beverages Companies, Glass Industries, Ceramic Industries, Auto Part, Garment Industries, Cosmetic Industries.
- 2) Tubes & Cones
Cone Tubes for Paper Mills, Core Polly Films/Plastic, and Textile tubes/Yarn Tubes.
- 3) Wrapping Purpose
Wrapping of paper rolls/sheets, Wrapping of laminate, Furniture wrapping, Bags Manufacturing. Also to make corrugated boxes, / Match Boxes /Shoe Boxes, etc.

Kraft Paper Range:

GSM	BF	Deckle Size	Cobb	Die. of Reel	Color
70 to 170	14 to 24	2500mm	As per Requirement	48" Max.	As per requirement

Duplex Paper:-

Duplex Paper is generally manufactured by using bleached and unbleached paper together to form duplex paper. One side of the duplex paper will be cleaned and bleached and the other sides are unbleached and rough. In India there are few manufacturers in organic sector. Duplex paper largely used in paper bags like cement bags and paper shopping bags and even also for food packaging industry, Also used for Gift Boxes / Shoe Boxes / Product Packaging Boxes/ Food Packaging/ Flat Files. There is good market growth of paper bags.

Duplex Board Range

GSM	Deckle Size	Cobb
150 to 400	2500mm	As per requirements

Bio Fuel

The Bio-Diesel production involves mainly two steps:

- 1) Extraction of oil from the seeds.
- 2) Conversion of vegetable oil to bio diesel.

The extraction of oil can be done in any suitable oil extraction unit. Commonly used oil extraction units can be used for extraction of oil from Jatropha as well. The second step of conversion of vegetable oil to bio diesel requires chemical processing plant. The operation of this plant requires specific training and this can be done by well trained engineers/ diploma holders/chemists.

NOTES FORMING PART OF THE ACCOUNTS

A. SIGNIFICANT ACCOUNTING POLICIES

BASIS OF PREPARATION OF FINANCIAL STATEMENTS

The Financial Statements have been prepared in conformity with Generally Accepted Accounting Principles to comply in all material respects with the notified Accounting Standards ('AS') under Companies Accounting Standard Rules, 2006, (as amended), the relevant provisions of the Companies Act, 2013 ('the Act'). The Financial Statements have been prepared under the historical cost convention on an accrual basis. The accounting policies have been consistently applied by the Company and are consistent with those used in the previous year.

a) Change in Accounting Policy

Presentation and disclosure of financial statements

During the year ended 31 March 2015, the Revised Schedule VI notified under Companies Act 2013, has become applicable to the Company, for preparation and presentation of its Financial Statements. The adoption of Revised Schedule VI does not impact recognition and measurement principles followed for preparation of Financial Statements. However, it has significant impact on presentation and disclosures made in the Financial Statements. The Company has also reclassified the previous year figures in accordance with the requirements applicable in the current year, for comparison.

b) Method of Accounting

The Company follows mercantile system of accounting and recognizes income and expenditure on accrual basis.

c) Use of Estimates

The preparation of Financial Statements in conformity with Generally Accepted Accounting Principles in India requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses and disclosure of contingent assets and liabilities at the end of the reporting period. The estimates and assumptions used in the accompanying Financial Statements are based upon management's evaluation of the relevant facts and circumstances as of the date of the Financial Statements. Actual results may differ from the estimates and assumptions used in preparing the accompanying Financial Statements. Any revisions to accounting estimates are recognized prospectively in current and future periods.

d) Fixed Assets, Depreciation, amortization and impairment of assets

Tangible Fixed Assets and Intangible Assets

Tangible Fixed assets and Intangible Assets are stated at their original cost of acquisition, net of accumulated depreciation and CENVAT credit, and include taxes, freight and other incidental expenses related to their acquisition / construction / installation. Pre-operative expenses relating to a specific project are capitalized till all the activities necessary to prepare the qualifying asset for its intended use are completed. Expenses capitalized also include applicable borrowing costs.

Intangible Assets

Intangible Assets are recognized in the Balance Sheet at cost, net of any accumulated amortization / impairment. Preliminary expenses are amortized over a period of 5 years. De-merger expenses are amortized over a period of ten years.

Depreciation

Depreciation is provided on all depreciable assets by Written down Value Method at the rates prescribed in schedule XVI to the Companies Act, 2013 as amended from time to time. Depreciation has been calculated on pro-rata basis from the date of acquisition / Installation of asset. Depreciation as per Income Tax has been separately calculated for ascertaining the Tax liability.

Impairment of assets

An asset is treated as impaired when the carrying cost of the asset exceeds its recoverable value. An impairment loss is charged to the Profit and Loss account in the year in which an asset is identified as impaired.

e) Investments

Investments are classified into current and long-term investments. Current Investments are carried at lower of cost or fair market value. Any diminution in their value is recognized in the profit and loss account. Long-term investments, including investment in subsidiaries, are carried at cost. Diminution of temporary nature in the value of such long-term investments is not provided for except when such diminution is determined to be of a permanent nature.

Investment Property

An investment in land or buildings that are not intended to be occupied substantially for use by, or in the operations of, the Company is classified as investment property. Investment Properties are stated at cost less accumulated depreciation / amortization and impairment losses, if any. Cost comprises the purchase price and any attributable cost of bringing the investment property to its working condition for its intended use. Depreciation on the building component of the investment property is calculated on a Written down Value Method ('WDV'), and is equal to the rates prescribed in Schedule XIV of the Act. On disposal of an investment, the difference between its carrying amount and the net disposal proceeds is charged or credited to the Statement of Profit and Loss.

f) Inventories

Inventories are valued at cost or net realizable value, whichever is less. Cost comprises of expenditure incurred in the normal course of business in bringing such inventories to their location. Finished goods at the factory are valued at cost in all applicable cases. Obsolete, non-moving and defective inventories are identified at the time of physical verification of inventories and adequate provision, wherever necessary, is made for such inventories.

g) Revenue Recognition

Income is recognized when the goods are dispatched in accordance with terms of sale. Sale is inclusive of excise duty, as applicable.

In respect of income from services, income is recognized as and when the rendering of services is complete. Revenue from time period services is recognized on the basis of time incurred in providing such services.

h) Borrowing Costs

Borrowing costs that are directly attributable to the acquisition or construction of a qualifying asset are capitalized as part of cost of such asset. Other borrowing costs are treated as a period cost and are expensed in the year of occurrence.

l) Income and Deferred Tax

The provision made for income tax in the accounts comprises both the current and deferred tax. Current tax is provided for on the taxable income for the year.
